

A NEW INNOVATION BY **JAKE'S**

JAKES HEAVY DUTY REAR SUSPENSION SPRING KIT FOR YAMAHA G-14/16/19/20/22 PART# 6280

ASSEMBLY INSTRUCTIONS

1. Remove the rear shocks from cart.
2. The top spring retainer must be removed from the shock. To do this, the ideal means would be a spring compressor. The alternative would be to grind or cut the stock spring in the center to relieve tension of the spring so that the retainer can be removed.

3. Once the retainer is removed, slide off stock spring and dispose of it.
4. Making sure that the shock is fully extended, slide Jake's new red spring onto shock and replace stock retainer.
5. Push spring up tight against retainer and place the 2 piece collar (provided in the kit) in the remaining space between the spring and the bottom of shock.
6. Repeat steps 1-5 for second shock.
7. Put shocks back on cart.
