

E-Z-GO RXV Seatbelt Kit Installation Instructions Part# 50078

Parts List

Main Mount (long)-1

Support Mount (small)-1

Seatbelt-1

Hardware Kit-1

 **Always remember to wear appropriate eye protection!**

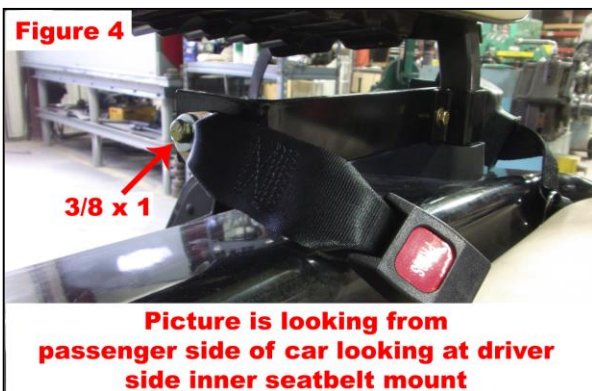

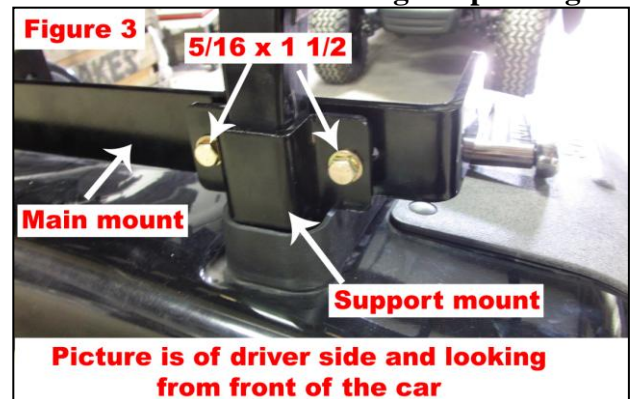

NOTE: This kit will do one side of the car. If you want to install seatbelts for both the driver and passenger side of the car you will need to purchase two kits.

Installation Instructions:

1. Measure 3 1/2" down from the top of the rubber grommets on the seat back support as shown in FIGURE 1.

NOTE: Only mark the grommet for the side of the car you are installing the seatbelts for. Draw a line around the entire grommet.

2. Using a utility knife cut the grommet along the line. Remove the top portion of the rubber grommet as shown in FIGURE 2.
3. Using the supplied 5/16 x 1 bolts, washers and locknuts loosely mount both the main mount and support mount to the car as shown in FIGURE 3. **NOTE:** The main support goes to the backside of the seatback support as shown. The main support has two slotted holes for mounting. Depending which side of the car you are installing the seatbelts for you need to make sure the slotted holes go towards the outside of the car as shown.
4. Using the supplied 3/8 x 1 bolts, washers and locknuts install the seatbelts to the main mount as shown in FIGURES 4 & 5.
5. Once seatbelts are mounted, use the slotted holes in the main mount to move seatbelts to desired location and securely tighten all bolts.
